What's the efficiency of the platysma on neck lift?

Should we open submental areas or not?

Does the slicing of the platysma work?

When should we treat the neck deeply?

What's the real purpose of the digastric muscle for the cervical contour?

How should we treat the platysmal bands and how can we avoid reoccurrence?

How should we treat subplatysmal fat?

How should we treat retaining ligaments of the face?

Why should I avoid treating the deep structures of the neck?
